

AUSTRALIAN JUNIOR CHESS CHAMPIONSHIPS
PROBLEM-SOLVING COMPETITION
SYDNEY 2019

NAME: _____

AGE GROUP (circle): U8 U10 U12 U14 U16 U18

GENDER (circle): BOY GIRL

You have up to two hours to solve as many problems as you can.

In all diagrams White is playing up the board. All tasks are worth 5 marks; a partial score can be achieved by a partial solution or a near miss. The problems are ordered roughly according to difficulty, easiest first. It is recommended to start at the beginning and work through in approximate order. There is no penalty for skipping a problem.

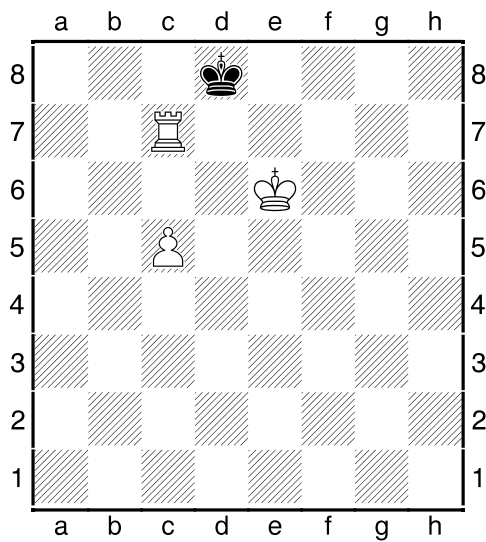

Please write your solution in the space provided below the diagram. For 2-move problems, just give White's first move. For 3-move problems, give up to White's second move. For the 5-move problem, give up to White's fourth move.

For a helpmate problem, Black moves first and helps White mate in the required number of moves. For endgame studies, just go far enough to reach a clearly winning or drawing position, without giving minor details. In both the studies and the 2, 3 or 5 move problems, include any variations which you believe are important.

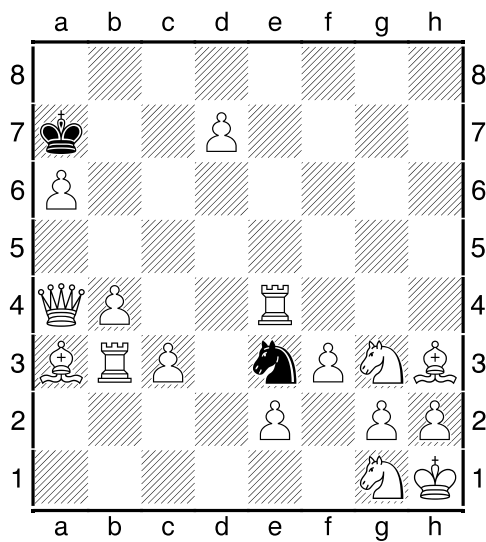

Solve as many tasks as you can, though there is no expectation that you will solve them all! As a guide, those who are young or new to solving might expect to do well on tasks 1-5, but could have success with other problems. The most experienced solvers might make an attempt at all problems. But there are no restrictions: anyone may attempt any of the tasks, though everyone, including experts, should start at the beginning.

An answer sheet will be available at the end of the solving period.

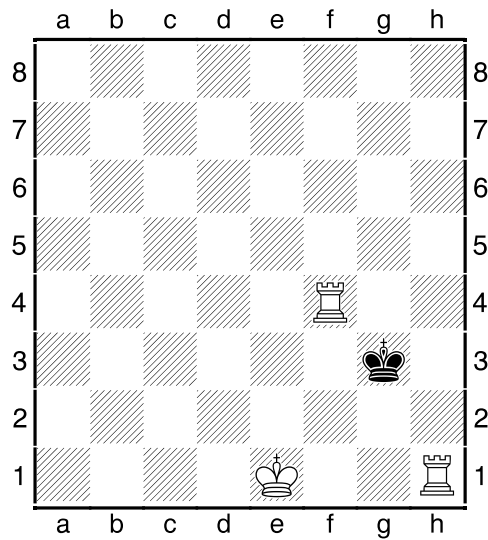

1) White to play and mate in 2 moves.

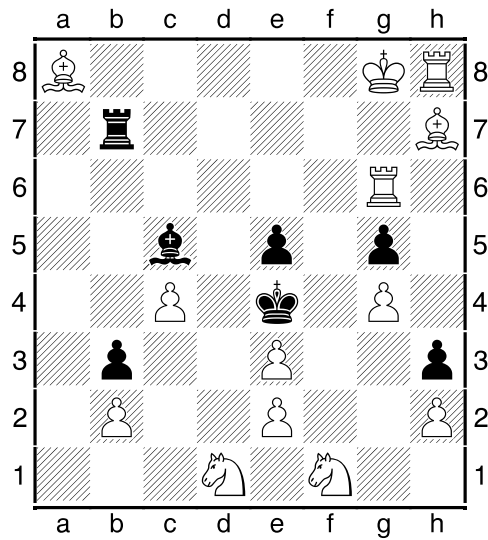

2) Black to play and win.

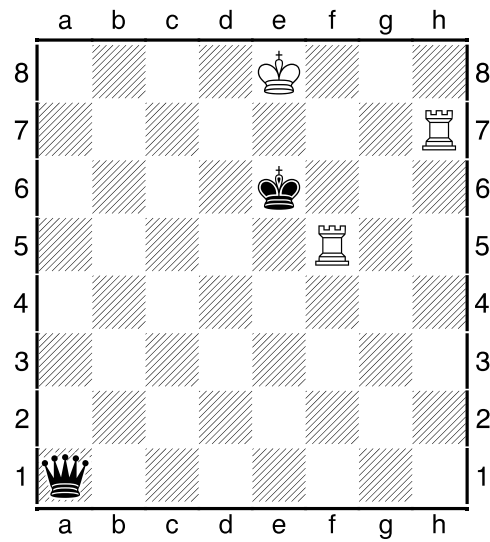

3) White to play and mate in 2 moves.

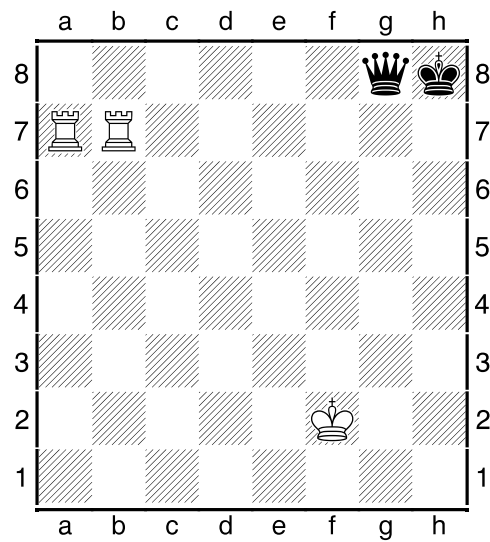

4) White to move and NOT checkmate in 1 move.

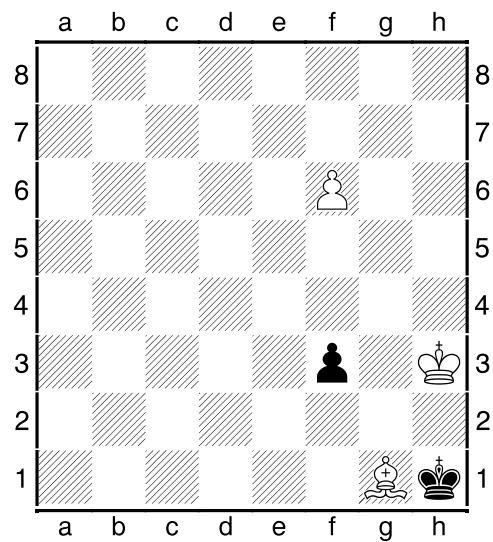

5) White to play and win.

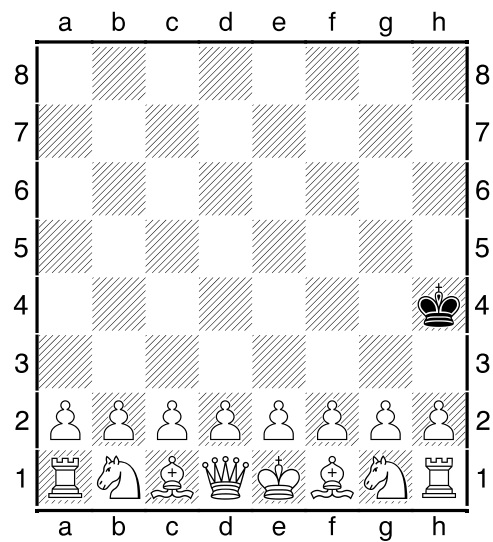

6) White to play and win.

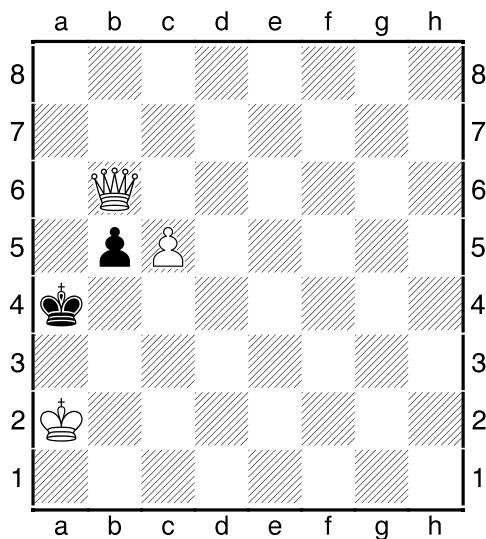

7) White to play and win.

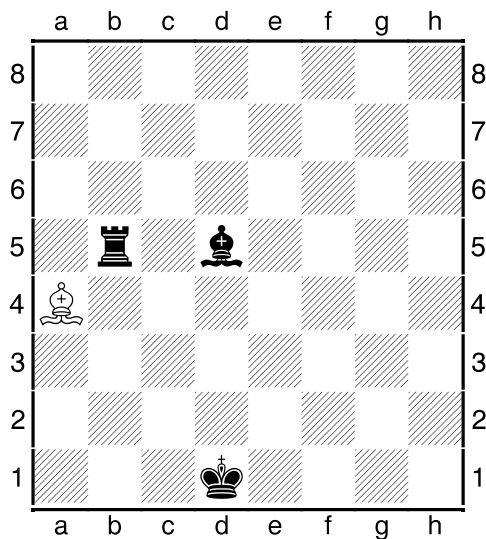

8) White to play and mate in 3 moves.

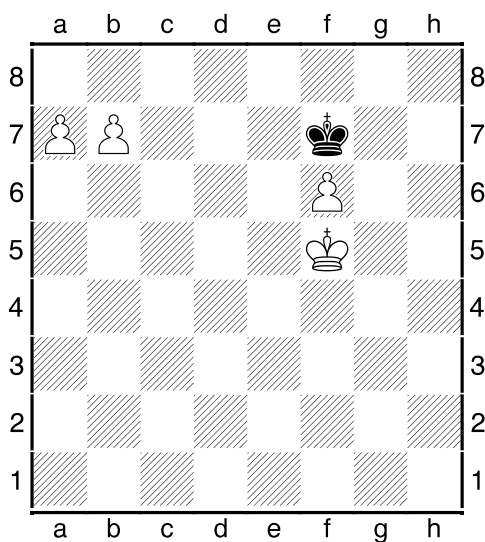

- 9) White to play and mate in 3 moves.

- 10) What is the only legal square on which the White king can be? Demonstrate why by showing some moves leading up to the diagrammed position below.

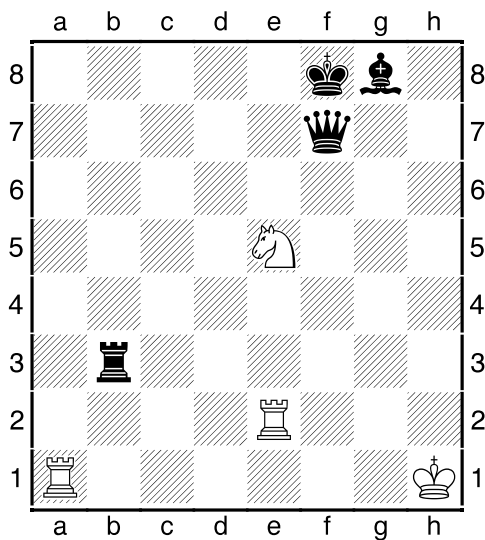

11) White to play and mate in 3 moves.

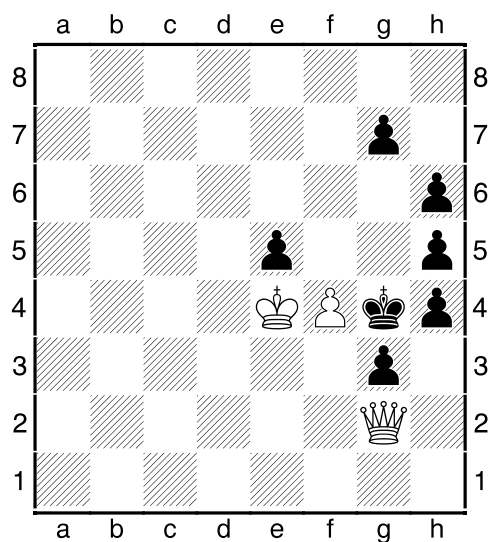

12) Black decides to copy White every move from the starting position, and Black is checkmated on White's fourth move. What are the moves?

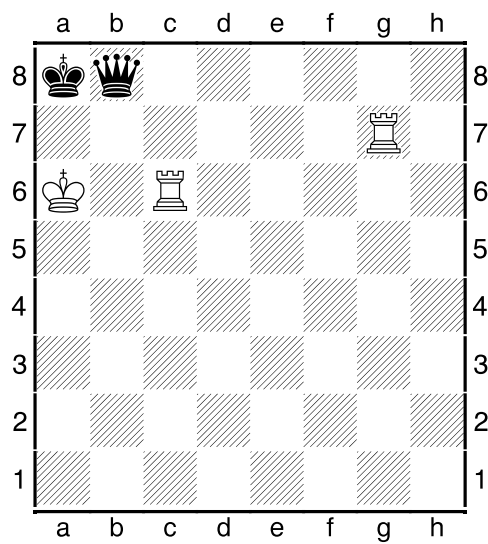

13) Helpmate in two moves: Black moves first and helps White to checkmate Black on the second move (by White).

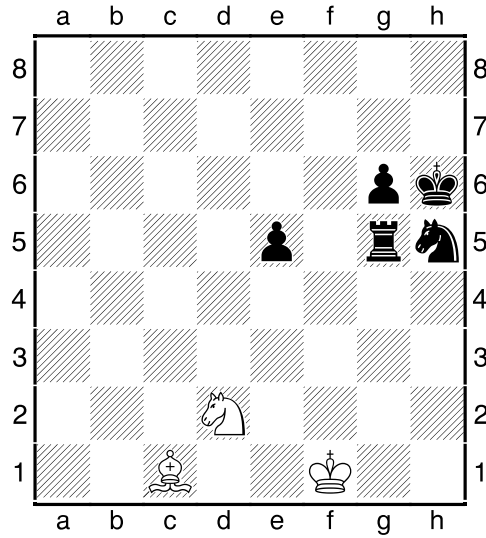

14) White to play and mate in 3 moves.

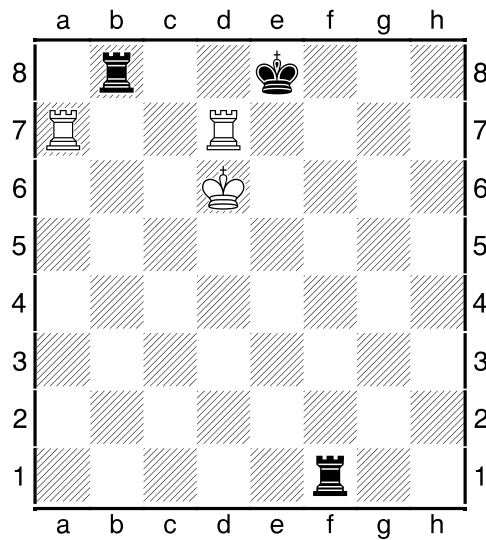

15) White to play and win.

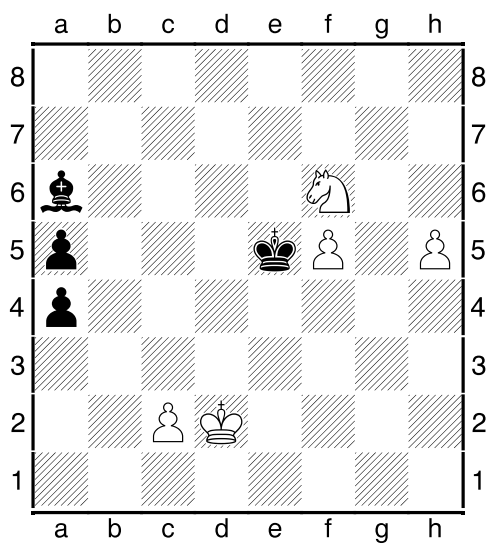

- 16) Helpmate in three moves: Black moves first and helps White to checkmate Black on the third move (by White).

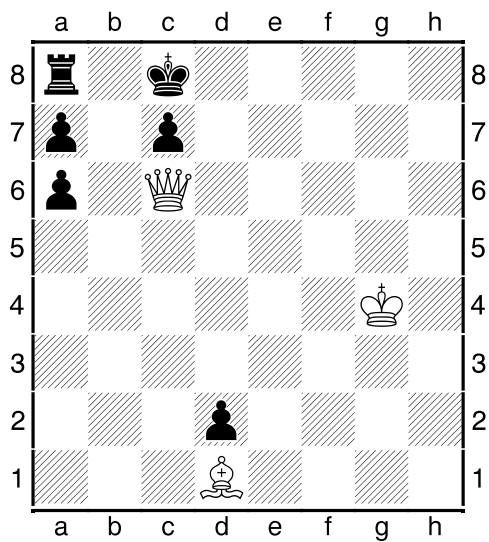

- 17) White to play and win.

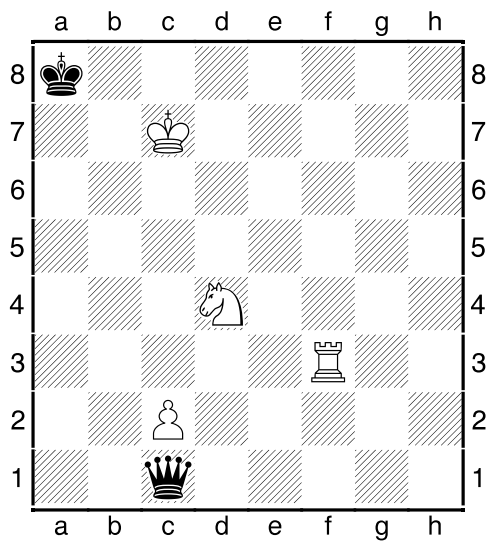

18) White to play and win.

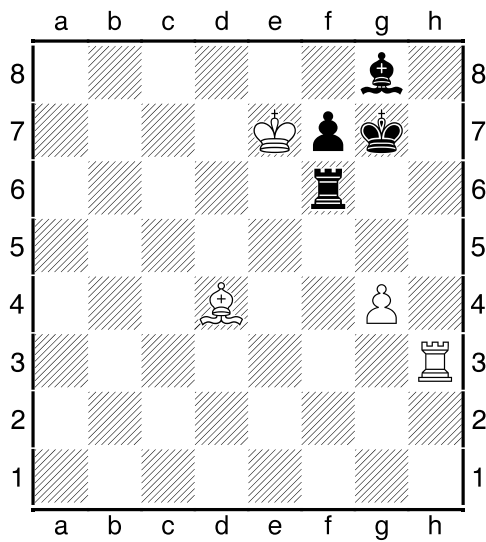

19) White to play and mate in 3 moves.

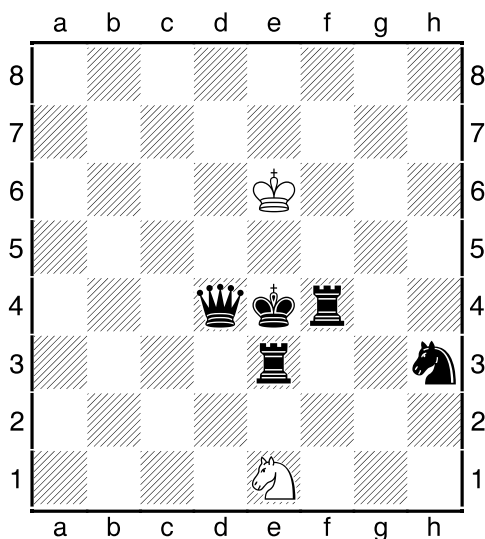

20) White to play and win.

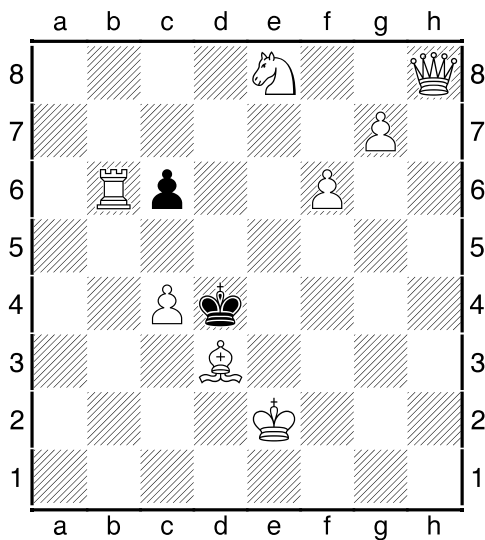

21) White to play and mate in 5 moves.

- 22) Helpmate in two moves: Black moves first and helps White to checkmate Black on the second move (by White).

- 23) White to play and mate in 2 moves.

- 24) After Black's fifth move from the starting position, there is a White rook on h8 and a Black rook on h1. What are the moves?
